Tazarotene cream is 0.05% and 0.1%.

What is the most important information I should know about tazarotene cream?

Tazarotene cream may cause birth defects if used during pregnancy.

- Females must not be pregnant when using tazarotene cream or become pregnant during treatment with tazarotene cream.
  - For females who are able to get pregnant:
    - o Your doctor should start a pregnancy test for you within 2 weeks before you begin treatment with tazarotene cream to be sure that you are not pregnant. Your doctor will decide when to do this.
    - o You should begin treatment with tazarotene cream during a normal menstrual period.
- Use an effective form of birth control during treatment with tazarotene cream. Talk with your doctor about birth control options that may be used to prevent pregnancy during treatment with tazarotene cream.
- Stop using tazarotene cream and tell your doctor right away if you become pregnant while using tazarotene cream.

What is tazarotene cream?

- Tazarotene cream 0.05% and 0.1% is a prescription medicine used on the skin (topical) to treat people with plaque psoriasis.
- Tazarotene cream 0.1% is also used on the skin to treat people with acne vulgaris.
- It is not known if tazarotene cream is safe and effective for treating plaque psoriasis in children under 18 years of age, or for treating acne vulgaris in children under 12 years of age.

Who should not use tazarotene cream?

- **If you are pregnant or breastfeeding:** Do not use tazarotene cream if you:
  - o Are pregnant.
  - o Are breast-feeding.

Before you use tazarotene cream, tell your doctor or pharmacist:

- o If you have or have had any medical conditions.
- o If you are taking any prescription or nonprescription medicines, vitamins, or supplements.
- o If you are allergic to tazarotene or any other ingredients in tazarotene cream.
- o If you have any other concerns.

Tell your doctor about all the medicines you take, including prescription and nonprescription medicines, vitamins, or supplements. Your doctor or pharmacist can tell you if a medicine interacts with tazarotene cream.

If you have acne:

- o Wash your hands with soap and water before and after using tazarotene cream.
- o If you wash tazarotene cream off in your eyes, on your eyelids, or in your mouth. If tazarotene cream gets in or near your eyes, rinse them well with water.

Important Information: Tazarotene cream is for use on skin only. Do not use tazarotene cream in your eyes, mouth, or vagina.

**Full Prescribing Information: See end of this leaflet for a complete list of ingredients in tazarotene cream.**

The end of this leaflet is complete for a list of ingredients in tazarotene cream.
